

Online environment

Criminal Justice System

www.cjsoline.org

The brief was to create a revitalised design approach for CJS online and propose online usage for the CJS brand identity. Working closely with in house developers the interface had to be developed inline with the 'Rythmyx' CMS. In conjunction with this there was a requirement to communicate CJS's complex IT infrastructure with various government departments. We developed an interactive walkthrough which explained key elements of the network.

- Key activities included
- Online brand audit
- User interface creation
- Information architecture development
- Creation of the online brand experience
- Search engine optimisation
- Usability analysis and testing

- Compliance with priority 1 and 2 of the DDA
- Compliance with the Office of E-envoy guidelines
- Build of templates (XHTML CSS2)
- Design and development of an interactive walkthrough
